The use of water depends
on weather.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

DIVERSION

WITHIN: SE1/4 OF SE1/4 SECTION 17, T16N, R12W, MDB&M.

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1991. (Additional information on reverse side of this form.)

- A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.
- Amounts below are: ☐ Gallons ☐ Acre-feet ☐ _____ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1988			✓	✓			✓	✓					
1989			✓	✓			✓	✓					
1990			✓	✓			✓	✓					

- B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation Grapes 30 acres

Stockwatering none

Domestic none

Other (specify) _____

- C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

none

- D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

DATED: 2/4, 1991, at Ukiah, Mendocino Co, California

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

DIV. OF WATER RIGHTS
SACRAMENTO

- A. Name of person diverting water Guido and Josephine Venturi
Address P.O. Box 45, Calpella, CA 95418 Telephone: (707) 485-8736
address change (see supplemental statement)
- B. Name of body of water at point of diversion Unnamed Stream
Tributary to West Fork Russian River
- C. Place of diversion SE 1/4 SE 1/4 ^{proj.} Section 17, Township 16N, Range 12W, MD B&M,
Mendocino County, or locate it on sketch of section grid on reverse side with regard to section
lines or prominent local landmarks.

D. Name of works _____

E. Capacity of diversion works _____

1000 gpmcubic feet per second
gallons per minute
gallons
acre-foot

Capacity of storage reservoir _____

State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
			✓	✓	✓								

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum annual water use in recent years _____

gallons
acre-foot
gallons
acre-foot

Minimum annual water use in recent years _____

Type of diversion facility: gravity _____, pump ☒

Method of measurement: weir _____, flume _____, electric power meter _____, water meter _____, estimate _____

F. Purpose of use (what water is being used for) Frost protection, irrigation, stockwatering

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)

30 acres of vineyard

* H. Year of first use as nearly as known _____

I. Name of person filing statement same as above

Position _____ Organization _____

Address _____ Telephone: _____

I declare under penalty of perjury that the above is true and correct to the best of my knowledge and belief.
